PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience designing and delivering backend systems using Java 8, Spring Boot, Spring MVC, and RESTful Web Services. Proficient in OOP, Collections Framework, Multithreading, Exception Handling, and writing clean, testable code with JUnit. Hands-on experience with CI/CD pipelines, Agile/Scrum methodology, MySQL, and ITSM automation. Currently building a Distributed Task Processing System and a Full-Stack URL Shortener with Analytics. Seeking Java Developer or Backend Engineer roles.

WORK EXPERIENCE

Software Engineer | Sopra Steria, Noida *Aug 2022 – Jun 2024*

- Developed and maintained **scalable backend services** using **Java 8, Spring Boot, Spring MVC, and MySQL**; applied **OOP, Collections Framework, Multithreading**, and **Exception Handling** for robust, production-grade code.
- Designed and consumed **RESTful Web Services** via Postman; integrated APIs between **ServiceNow and Apache Karaf**, enabling seamless cross-platform data exchange across enterprise systems.
- Optimised **ITSM workflows** in **SMAX and ServiceNow** following **Agile/Scrum** methodology, improving process efficiency by **30%**; resolved **20+ production issues**, cutting bug-resolution time by **50%**.
- Wrote **JUnit unit tests** achieving **95% bug-free deployment rate**; maintained **CI/CD pipelines via GitLab**; trained **15+ users**, reducing onboarding time by **30%**. Awarded **SPOT Award** (Jan 2024 & Aug 2023).

PROJECTS & INDEPENDENT WORK

Full-Stack URL Shortener with Analytics | Java · Spring Boot · React · MySQL · Redis · REST API | Link *Feb 2026 - Present*

- Built a **full-stack application** with a **Spring Boot REST backend** and **React frontend**; features URL shortening, **click analytics dashboard**, expiry management, and user authentication.
- Used **Redis for caching** frequent redirects for low-latency response; documented APIs with **Swagger/OpenAPI**; includes **JUnit integration tests** and responsive UI.

Climate Fellowship – Women in Energy | Climate Collective | Data Analytics · Python · AI *Aug 2025 – Present*

- Applying **Python, data analytics, and AI** to optimise sustainable energy solutions within a structured research and mentorship programme.

Distributed Task Processing System | Java 11 · Spring Boot · RabbitMQ · MySQL · Docker · REST API · Junit *2025 - Present*

- Backend-heavy system for **asynchronous task queuing and processing** using **Spring Boot and RabbitMQ**; implements producer-consumer architecture with **retry logic, dead-letter queues**, and fault-tolerant worker threads.
- Exposed **RESTful APIs** for task submission and status tracking; containerised with **Docker**, tested with **JUnit**, and deployed via **CI/CD pipeline on GitHub Actions**.

Aspire Leadership Program | Aspire Institute | Competitively Selected | Link *Jan 2025 – Apr 2025*

- Selected through a **competitive application process** for a global leadership programme focused on **critical thinking, problem solving, and professional development**.
- Completed structured modules on **leadership, communication, and decision-making**; collaborated with peers across industries to tackle real-world challenges.

Freelance – Proposal Writing & Climate Website | WordPress · GIS Mapping · REST APIs · Technical Writing *2024 – Present*

- Developed a **climate and health content platform** using **WordPress and GIS mapping tools** with automated article ingestion via REST APIs.
- Delivered **technical project proposals** for clients; demonstrated documentation, stakeholder communication, and independent project delivery skills.
